

Date: 05/09/2026

Dear Ms. Tara

Greetings from Ryzenforge Enterprises LLP

Thank you for considering Ryzenforge Enterprises LLP Services for your Custom Application needs. In this proposal, I have laid out the project structure/process, estimated weeks and total Costs that will require developing Operations Module.

Thanks again for the opportunity, and we look forward to working for you!

Dhanush Shankar

Please find below the available options for your consideration. You may select the option that best suits your requirements, but we recommend option b for best results.

OPTION A : Custom Developed E-Commerce Website

Price: ₹50,000 + 18% GST

Free 1 Year Hosting | Renewal: ₹3,000/year

Advance Payable: 70% of the Project cost

A fully custom-developed, mobile-optimised e-commerce website designed to provide a smooth shopping experience and an easy-to-manage business platform.

Key Features Include:

- Custom website design and development
- Responsive design for mobile, tablet & desktop
- Product catalogue and product management
- Product categories, variants, pricing & offers
- Shopping cart and secure checkout
- Online payment gateway integration
- Customer registration and account management
- Order placement, order management & order status tracking
- Shipping/delivery information management
- Inventory/stock management
- Coupon and discount management

- CMS for managing website content
- Banners, pages, blogs and promotional content management
- Contact/enquiry forms
- SEO-friendly website structure
- Social media integration
- WhatsApp integration
- Basic analytics and reporting
- Speed and performance optimisation
- Basic security configuration
- Cross-browser compatibility

OPTION B : Advanced Custom-Developed E-Commerce Platform

Price: ₹80,000 + 18% GST

Advanced Package – Custom Pricing

Advance Payable: 70% of the Project cost

A more powerful, scalable e-commerce platform built with all the features of the standard package, along with advanced CMS, business management and automation capabilities.

Includes all Basic E-Commerce Features, plus:

- Advanced CMS with greater control over website content
- Advanced product and inventory management
- Advanced order management and tracking
- Customer management system
- Advanced customer dashboard
- Multiple product attributes and variations
- Advanced offers, discounts and coupon management
- Sales and order analytics
- Business performance dashboard
- Advanced shipping and delivery management
- Automated customer notifications
- Advanced enquiry and lead management
- Promotional banner and campaign management
- Blog/content management system
- SEO management controls
- Integration-ready architecture for third-party services
- Scalable architecture for future features and integrations
- Advanced admin controls and permissions
- Custom business workflows and automation
- API/integration support as required

ADD-ONS :-

1. Store Manager / Business Management Module

Price: ₹5,000 + 18% GST

An additional management module that allows the business owner or store manager to efficiently manage day-to-day e-commerce operations from a central dashboard.

Features Include:

- Manage and update products
- Add, edit and remove products
- Manage product categories and pricing
- Monitor and update stock levels
- View and manage customer orders
- Update order status
- Track pending, processing and completed orders
- Manage customer information
- View basic sales and order information
- Manage offers, discounts and promotional content
- Centralised dashboard for daily store operations

Ideal for businesses where a dedicated person handles products, inventory and order management.

2. WhatsApp Business Automation

Price: ₹15,000 + 18% GST

A WhatsApp automation system designed to reduce manual communication and help business owners manage customer interactions more efficiently through automated messages and workflows.

Key Features Include:

- Automated order confirmation messages
- Order status and delivery updates
- Automated customer notifications

- Instant responses to common customer enquiries
- Product/service information sharing
- Automated enquiry responses
- Welcome messages for new customers
- Follow-up message automation
- Customer enquiry notifications
- Payment/order-related notifications
- WhatsApp-based customer communication
- Predefined automated message templates
- Trigger-based messaging based on customer actions

Business Benefit:

Instead of manually responding to every customer and sending every order update, WhatsApp automation handles routine communication automatically. This is particularly useful for small businesses and business owners managing operations themselves, helping save time, respond faster and maintain consistent customer communication.
